Projects:

Employee Management System (Java, MySQL, Swing) | [Git hub – Link](#)

Feb 2025

- Built a desktop-based system to manage employee records with **CRUD** functionality.
- Implemented **JDBC** connectivity with MySQL for efficient data handling.
- Designed GUI with Java Swing & AWT, ensuring usability and scalability.
- Future enhancements: user authentication, role-based access, and cloud migration.

Incredible India – Tourism Portal (HTML, CSS, JavaScript) | [Git hub – Link](#)

July 2025

- Developed a fully functional tourism booking portal using HTML, CSS, and JavaScript, allowing users to search, filter, and book destinations across multiple Indian cities.
- Implemented dynamic destination rendering and filtering based on city and keyword, enhancing the user experience with responsive and interactive UI.
- Designed a client-side ticket booking system using local Storage to store user bookings, with real-time form validation and cancellation features.
